WORK EXPERIENCE AND INTERNSHIPS

Zibal Technologies Pvt. Ltd., Noida   *Intern, Angular Development (January-May, 2020)*

Had an opportunity to learn in depth about the Angular framework.
- Created a user management website for the Company called Rigil Virtual Team functional as rvt.rigil.us.
- The website majorly used reactive forms, had multi-tenant architecture and roll-based access at feature level, used customized filters.
- **Technologies Used**: HTML, CSS, Angular, Bootstrap, Typescript.
- The project was live while in development, making it more challenging but helped me learn more as well.
- Understood how manual testing works, and learnt how to consider even the corner test cases while developing.

PROJECTS

User Management Website using Angular	The website has multi-tenant architecture and roll-based access. Integrated Gmail and hangout as well. Most important modules include settings, leave management, provide feedback/request feature and customized filters. The reactive forms were used.
Backend for GirlScript Kurukshetra's website	Made the backend using MongoDB Atlas in Node.js. The website's frontend is under construction, and will have roll-based accesses. For users, the options available are view About us, Contact us, Gallery, FAQs, Team Details and Events. Additional features available to the admins are editing all the info.

TECHNICAL SKILLS

- Technical Languages : C++, JavaScript, HTML, CSS, Nodejs.
- Data Structures and Algorithms.
- Frameworks: MongoDB, Angular, Nodejs.
